

## Rissan, Sicrall & Corvum Tapes

### Internal Sealing Tapes

- Low vapour permeability to stop excess internal moisture from entering joints between substrates and stops:
  - condensation/moisture build up behind tape and any 'blow out' of RAB joints
  - any mould and mildew growth.
- 100% airtight.
- Extremely high adhesive strength – sticks from -40C to 100C.
- Easy to apply with pre-folded and split release backing paper options.
- Green and safe - Free of VOC's, solvents, high boilers, plasticisers, chlorine and formaldehyde
- Ensures joint protection between OS' Brace Panels, and between OS' Brace Panel and all adjoining substrates, including wood, OSB, plywood, fibre cement boards, concrete, masonry, plaster, bituminous sheeting to base area, rigid insulation(EPS/XPS/PU), metal, hard plastic, smooth to slightly rough PE/PA/PO/PP membranes, kraft papers and aluminium sheeting, as per Siga substrate matrix.
- 50+ years durability

**Rissan 60**  
60mm x 25m

**Rissan 100**  
100mm x 25m

**Rissan 150**  
150mm x 25m

**Sicrall 60**  
60mm x 40m

**Corvum 30/30**  
60mm pre-folded  
x 25m

**Corvum 12/48**  
60mm pre-folded  
x 25m
