

## IBS Maintenance Sheet

# Care and Maintenance of IBS supplied Egger OSB Barn Lining

### EGGER OSB BARN LINING

Created from oriented strand board (OSB), EGGER OSB Barn Lining is an edge sealed internal ceiling and wall lining. It is for use with timber or steel framing.

Lightweight and easy to handle, it is a strong, dimensionally stable panel that resists warping and delamination. Once installed EGGER OSB Barn Lining it is not intended to be left in its raw state.

### FINISHING THE LINING

**EGGER OSB Barn Lining** is required to be sealed or overlaid with an appropriate protective covering such as paint or a membrane system compatible with a composite timber.

Where the panels are used in areas prone to water splash, a waterproof membrane or impervious covering must be used.

### MAINTENANCE

Under normal conditions EGGER OSB Barn Lining requires no maintenance providing that the protective covering has been maintained. If water damage occurs to an area where EGGER OSB Barn Lining has been used, ensure the area is allowed to dry before replacing any covering or coating.
